CRITIQUES

23

Sommaire

1	Semgrep	Analyse SAST — vulnérabilités de sécurité
2	TruffleHog	Détection de secrets exposés dans les fichiers
3	Pipeline CI	Secrets détectés dans les logs de CI/CD

Semgrep — Analyse SAST

TOTAL	ERREURS	WARNINGS	VERSION
1	1	0	1.162.0

Vulnérabilités détectées

Sévérité	Règle	OWASP	CWE	Message	Fichier / Ligne
ERROR	run-shell-injection	A01:2017 - Injection	CWE-78	Using variable interpolation `\${...}` with `github` context data in a `run:` step could allow an attacker to inject their own code into the runner. This would allow them to steal secrets and code. `github` context data can have arbitrary user input and should be treated as untrusted. Instead, use an intermediate environment variable with `env:` to store the data and use the environment variable in the `run:` script. Be sure to use double-quotes the environment variable, like this: "\$ENVVAR".	.github/workflows/vulnerable-pipeline.yml L.52

TruffleHog — Secrets détectés

TOTAL DÉTECTIONS

7

TYPES UNIQUES

4

Note : Certains secrets peuvent provenir de fichiers de librairies tiers (ex: .jar), ce qui peut générer des faux positifs. Il est recommandé de vérifier l'emplacement et le contexte de chaque détection.

Liste des secrets

Valeur (anonymisée)	Type	Description du détecteur	Emplacement (Fichier/Ligne)
sk_l*****p7dc	Stripe	Stripe is a payment processing platform. Stripe API keys can be used to interact with Stripe's services for processing payments, managing subscriptions, and more.	.github/workflows/vulnerable-pipeline.yml L.37
https://myLogin:*** *****@my_server/foo	URI	This detector identifies URLs with embedded credentials, which can be used to access web resources without explicit user interaction.	tools/eclipse-temurin-cnes/sonar-cnes-report-5.0.4.jar L.5341
desc*****hing	Gitlab	GitLab is a web-based DevOps lifecycle tool that provides a Git repository manager providing wiki, issue-tracking, and CI/CD pipeline features. GitLab API tokens can be used to access and modify repository data and other resources.	tools/eclipse-temurin-cnes/sonar-cnes-report-5.0.4.jar L.1616
inse*****ally	Gitlab	GitLab is a web-based DevOps lifecycle tool that provides a Git repository manager providing wiki, issue-tracking, and CI/CD pipeline features. GitLab API tokens can be used to access and modify repository data and other resources.	tools/eclipse-temurin-cnes/sonar-cnes-report-5.0.4.jar L.1617
AUTO*****Only	Gitlab	GitLab is a web-based DevOps lifecycle tool that provides a Git repository manager providing wiki, issue-tracking, and CI/CD pipeline features. GitLab API tokens can be used to access and modify repository data and other resources.	tools/eclipse-temurin-cnes/sonar-cnes-report-5.0.4.jar L.1602
azur*****With	Gitlab	GitLab is a web-based DevOps lifecycle tool that provides a Git repository manager providing wiki, issue-tracking, and CI/CD pipeline features. GitLab API tokens can be used to access and modify repository data and other resources.	tools/eclipse-temurin-cnes/sonar-cnes-report-5.0.4.jar L.4602
mong*****/app	MongoDB	MongoDB is a NoSQL database that uses a document-oriented data model. MongoDB credentials can be used to access and manipulate the database.	.github/workflows/vulnerable-pipeline.yml L.39
